# PALLADIO

# **MAIN FEATURES**

# • FAMILY FEELING:

The PC-582 directly refers to the Sonetto Collection for the choice of materials, the electroacoustic project and design.

The satin aluminum trim that frame the tweeter recalls the aesthetic of the "Voice of Sonus faber".

### • MAGNETIC GRILLES:

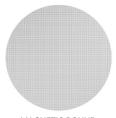

The PC-582 is equipped with a magnetic edgeless round metal grille, ready to be painted. The square metal grille is optionally available.

### QUICK INSTALLATION:

Thanks to the swing out dogs fixing system, all Palladio speakers can be secured quickly and effectively to plasterboard.

MAGNETIC SQUARE METAL GRILLE

### MID-WOOFER:

The custom diaphragm is made in natural fiber and cellulose pulp, according to the most natural sound.

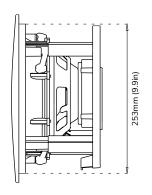

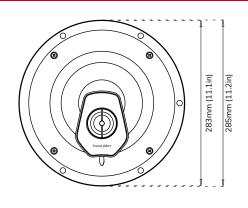

### PARACROSS TOPOLOGY ™

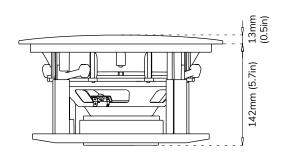

The anti-resonant design of the x-over network features the Paracross Topology™ circuitry, to guarantee a better definition and purity of sound.

<sup>\* [</sup>FOR A DIRECT SPL=85 dB; IEC TEST SIGNAL SIMULATING A NORMAL PROGRAM]

The huge difference between the values depends on the signals that have been considered in the two examples. A simple sine tone is the most elementary one while the IEC signal is quite complex. In a real world, while the first could conveniently represent the power needs for speech, the second gives an idea of the power needs for wide frequency range, large headroom music.
