Ingenious styling for audiophile listeners

RPM 5 Carbon utilises a radical concept with a lot of innovations, that originate from its big brother RPM 9 Carbon: A low resonance chassis holds a newly designed inverted platter bearing with ceramic ball for further reduced rumble. The acoustically inert platter is made from acrylic. An outboard 15V AC motor is smoothly

driven using an ultra-precision AC generator with DC power supply for further enhanced speed stability. The classy 9" cc Evo tonearm, which is made from carbon fibre is suitable for any high-quality MM or MC cartridge. A TPE-damped counterweight eliminates unwanted resonances. All ingredients add up to a miracle in sound for the price. Its ultra-stylish look is available in 3 exclusive high-gloss finish versions.
