

**See nothing, hear everything**

CWM8.3 D is a three-way in-wall loudspeaker, conceived to offer the very best performance for a customer requiring great sound without seeing the source.

It features a decoupled Diamond dome tweeter, a 5in Continuum FST midrange drive unit and two 7in Aerofoil low-frequency drivers.

The central baffle is rotatable, so CWM8.3 D can be used in either vertical or horizontal alignment.

For optimum discretion when installed, the Continuum cone is given a dark finish.

**Technical Specifications**

<b>Description</b>	3-way in-wall loudspeaker
<b>Technical features</b>	Aluminium mini baffle can be turned through 90 degrees Diamond Dome, Nautilus™ tube-loaded tweeter Anti-resonance plug Flowport™ FST™ midrange unit Carbon Aerofoil bass drivers
